

## ENHANCED QR CODE

PERSONALIZED QR CODE FOR PRINT & WEB

## Enhanced QR Code Generation

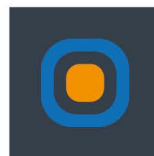

With Compose Enhanced QR Code, you can generate QR codes that are personalized with colors and logo images. You can fully customize every aspect of the QR code, including the shape and colors of the finder pattern and modules, filling the QR code with flat color, gradient or image pixels, and embedding your logo image as part of the QR code.

## Personalization Features

### FINDER PATTERN SHAPE

Change the finder pattern to one of the 15+ shapes available.

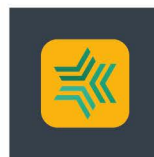

### FINDER PATTERN COLOR

Change the color of the finder pattern.

### QR CODE COLOR

Fill the QR code with flat color, gradient or image pixels.

### LOGO IMAGE

Add your company logo to the QR code.

# Readability Assistant

Enhanced QR Code makes it easier to generate readable QR codes, with the ability to suggest the best print size according to redundancy level, scanning environment, and the scan distance. You will also be able to check the scan-ability after coloring the QR code using the included tonal contrast calculator.

# Output Formats

QR codes are generated as PDF, JPG and PNG files.

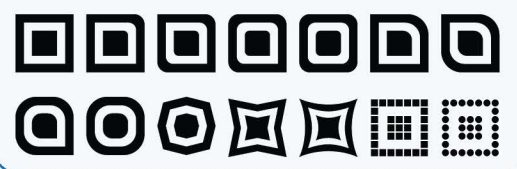

# Built for Velocity

The Enhanced QR Code function is included in the latest version of Velocity, the powerful but easy-to-use variable document creation software from Compose.

# System Support

- Intel Processors i5, i7, Xeon
- Windows 7 Professional SP1
- Windows 10 Professional
- Windows Server 2008, 2012

1 Finder Pattern Shapes
